Keystone Project - Comment Form

WSF welcomes your comments on the Keystone Project. Please respond to the questions in the space provided and return to the address listed on the other side, or drop in the comment boxes tonight. Please postmark by April 28, 2006.

WSF will study a number of factors during the environmental impact statement (EIS) process, such as fish and aquatic resources, parks, traffic, land use and air quality. What additional environmental issues should WSF consider?

WSF has identified four preliminary alternatives to study in an EIS. What do you think of these alternatives? Are there other alternatives WSF should consider?

Please comment on the purpose and need for this project:
